

NOTICE OF DISPOSITION 2020-NOD-23 SWITCHGEAR

The City of Penticton is disposing of a 3 phase, 15 KV Pad mounted Switchgear, Cooper Model VFI 9. The switchgear was purchased in September 2013 for \$30,000+. It has never been used as the viewing windows are on the tap side vs. the source side (which is the City's standard) of the switch and it is not cost effective for the City to retrofit it to the source side.

The switchgear is sold as is, where is, and it is up to the successful bidder to arrange for pickup from 616 Okanagan Avenue East, Penticton, BC.

Please contact Shawn at 250.490.2537 or shawn.filice@penticton.ca to arrange for viewing.

Pictures are available on the following website and bids can **only** be placed at <https://www.bcauction.ca/open.dll/welcome>

Closing date & time: Thursday, January 21, 2021 @ 7:05 pm.
